Profile

I am a junior Python developer. Mainly using Python and JavaScript, I'm constantly learning top of the art technologies, languages and frameworks to further expand my skills.
As a former secondary school ESL teacher, communication and team building are part of my core skills. My teaching experience also gave me strong skills in multitasking, organising and troubleshooting. Having a strong desire to constantly improve myself, I am always looking forward to upgrading my skills and/or learning new ones in order to make my code the most efficient as possible.
